- **Simple Placé** (Place): The bettor must pick a runner that finishes either first, second or third in the race. If there are 7 or less starters in the race, then third place is not counted and the bettor must pick a horse that finishes either first or second. This bet type is not available on events with 3 or fewer runners.
- **Couplé Gagnant** (Quinella): The bettor must correctly pick the two runners which finish first and second in any order.

- **Tiercé/Tiercé Classic**: First created in 1954. The bettor must correctly pick the first, second and third finishers in the race with a main dividend paid for selecting the exact order of finish, and a secondary "Désordre" dividend paid for selecting the correct three runners but in the wrong order. Essentially a combination Trio Ordre/Trio bet with the main dividend paying at least 5 times the secondary one. On popular or famous races this bet type is sometimes labelled "Tiercé Classique" but follows the same rules as the standard Tiercé.
- **Quarté+**: The bettor aims to correctly pick the first four finishers in the race with a main dividend paid for selecting the first four runners in their exact order of finish, a secondary "Désordre" dividend paid for the selecting the first four finishers but in an incorrect finishing order and a tertiary "Bonus" dividend paid for correctly selecting only the first three runners (in any order).
- **Quinté+**: The bettor aims to correctly pick the first five finishers in the race with a main dividend paid for selecting the first five runners in their exact finishing order, a secondary "Désordre" dividend paid for the selecting the first five finishers but in an incorrect finishing order, a "Bonus 4" dividend for selecting the first four finishers in any order, a "Bonus 4sur5" dividend for selecting four of the first five finishers in any order and a "Bonus 3" for selecting the first three finishers in any order. Furthermore, each **Quinté+** ticket is given a number between 1 and 3,000 for a possibility of winning the **Tirelire** which is a cumulated jackpot of at least 500,000 € but often exceeding millions of euros. In order to win this jackpot, one needs to win the **Quinté Ordre** (five first finishers in order) and have the winning number which is drawn and published moments before the race starts. A matching **No Plus** number multiplies earning by ten on any **Quinté** ticket irrespective of the order.

- **Pick5:** The bettor aims to correctly pick the first five finishers in the race irrespective of the order. PMU selects races on which this bet is available.
- **2sur4:** The bettor must correctly pick two out of the first four finishers in the race in any order. Only available on races with 10 or more starters.
- **Multi/Mini Multi:** The bettor selects between 4 and 7 horses for the **Multi** and between 4 and 6 for the **Mini Multi** which must contain the first four finishers in the race in any order. The main "Gagnant en 4" dividend is paid to winning bettors who selected four horses, with decreasing "Gagnant en 5", "Gagnant en 6" and "Gagnant en 7" dividends paid to winning bettors who selected five, six and seven horses respectively. The "Multi" bet operates on races with 14 or more starters. The "Mini Multi" operates on races with 10 to 13 starters and only allows for a maximum of six selections with no "Gagnant en 7" dividend.

Tiercé, Quarté+ and Quinté+ bets are typically only offered on the largest race of the day.
